Andorate **Champion Endoscope Valves**

 **Worldwide Patented Design**

 **Advanced Smoothing Technology**

 **Exceptional User Experience**

Multiple Protections

The lubricant-free and pre-sterilised Champion Endoscope Valve minimises the risk bacterial interaction with bodily fluids. The single-use design reduces the potential for cross-contamination and eliminates the need for disinfection.

Less Resistance

Designed explicitly for endoscopic applications, the Champion Endoscope Valve provides an exceptionally smooth user experience by decreasing friction in the valve control mechanisms.

Tactile Feedback

Champion Endoscope Valve provides precise and instant feedback, enabling the effective and accurate control of air and water during endoscopic procedures.

Reduced Finger Fatigue

Champion Endoscope Valve requires only a light depressing force, significantly reducing discomfort in physician's fingers during procedures.

Eco-friendly Packaging

Packaging of Champion is made from recyclable materials and printed with soy-based ink.
